## Awards

All-Arizona Academic Team Scholarship  
2026

Arizona Board of Regents & Phi Theta  
Kappa

Statewide recognition awarded to  
top-performing Arizona community  
college students for academic excellence,  
leadership, and community service.

8th Finalist, Most Distinguished Chapter  
2026

Phi Theta Kappa

Awarded to Beta Gamma Pi chapter  
among 1,200+ chapters worldwide,  
placing in the top 0.7% internationally,  
under chapter presidency.

Beta Alpha Continued Excellence Award  
2026

Phi Theta Kappa

Distinguished Officer Team Award 2026  
Phi Theta Kappa

Distinguished Honors in Action Award  
2026

Phi Theta Kappa

Awarded for our research & service  
project exploring preservation of stories  
through recipes.

Distinguished College Project Award  
2026

Phi Theta Kappa

Awarded for our student engagement  
initiative.

## Summary

Data-driven, improvement-minded electrical engineering student with a strong foundation in avionics, quality, and process improvement, now completing a BSE in Electrical Engineering at Arizona State University (Ira A. Fulton Schools of Engineering, transferred Fall 2026) after an AAS/AS from Yavapai College with a 4.0 GPA. Served as Phi Theta Kappa chapter president, leading the chapter to 8th Finalist for Most Distinguished Chapter (top 0.7% of 1,244 chapters globally). Skilled in troubleshooting, cross-functional team building, and both leading and coaching. Changemaker.

## Education

## Skills

### ☆ Canyon AeroConnect — Core Skills

AS9100D, FAA Part 145, Avionics, FAA Form 8130-3, EASA, Process Improvement, Value Stream Mapping, Root Cause Analysis, Kaizen, Excel, PowerQuery, KPI Reporting, First-Pass Yield, Quality Auditing, FOD, Cross-functional Collaboration

### ☆ Home Depot — Core Skills

Planogram Execution, Technical Documentation, Inventory Management, Cross-functional Collaboration, Independent Judgment, Process Execution

### ☆ Resa Wearables — Core Skills

Technical Support, FDM 3D Printing, Hardware Maintenance, Network Troubleshooting, Knowledge Base, Field Operations, Process Documentation

### ☆ Yavapai College (AS) — Core Skills

Physics, Mathematics, Leadership, SOLIDWORKS, Value Engineering, Research Skills

### ☆ Yavapai College (AAS) — Core Skills

Electronics Repair, Robotics, Electronic Troubleshooting, Programmable Logic Controllers (PLCs), Electronics

## Experience

### Canyon AeroConnect

Prescott, AZ

Process Improvement Specialist

October 2019 - January 2025

Progressive responsibilities across repair technician, FAA Repairman, group lead, and process improvement functions at an FAA Part 145 avionics repair station.

Performed hands-on troubleshooting and repair of audio control panels, data adapters, and control heads using approved technical data in compliance with FAA and EASA regulations. As an FAA-certificated Repairman (Nov 2021), authorized return-to-service via FAA Form 8130-3 with EASA dual-release, and drove first-pass yield increases from high 80s % to mid 90s % through an educational coaching approach to quality misses. Served on monthly FOD committee and annual AS9100D QMS auditor.

Directed daily workflow for a team of ~20 technicians as informal group lead. Owned monthly and quarterly KPI reporting — aggregating TAT and OTD data, synthesizing root causes, and co-presenting customer-specific corrective action reports to executive and sales leadership. Facilitated cross-functional pre-meetings to align department stakeholders before quarterly executive review. Revived dormant manufacturing returns committee; drove backlog reduction through structured weekly meetings, metrics visibility, and collaborative cross-departmental follow-through.

Formally appointed Process Improvement Specialist (Dec 2023) following earlier recognition for process improvements, including independent Excel automation that reduced reporting time by ~83%. Executed improvement initiatives stemming from a value stream mapping exercise, including foot traffic reduction design and ERP-integrated parts ordering workflow. Conducted formal time study and inventory classification to support capital equipment ROI justification; analysis supported successful procurement decision.

### Home Depot

Prescott Valley, AZ

Merchandising Execution Associate

January 2019 - October 2019

Overnight merchandising crew member executing corporate planogram-driven resets across hardware, appliance, and general merchandise departments. Worked across solo, paired, and full-crew configurations depending on project scope and scale.

- Executed planogram-driven resets ranging up to 500+ SKUs across up to 12 bays; projects scaled from single-shift tasks to ~200-manhour multi-phase installations
- Read and interpreted printed technical documentation to sequence and execute complex resets accurately under time pressure with minimal supervision
- Identified a documentation error in a multi-phase reset plan; executed a workaround under suboptimal conditions and completed ahead of estimated time
- Coordinated with management, area leads, and crew members to align on project scope, sequencing, and handoffs across shifts

<https://www.homedepot.com>

**Resa Wearables**

Prescott, AZ

Technical Support Specialist

May 2018 - November 2018

Hired through a technical training program into a support role; assumed progressive expansion of responsibilities. Maintained and repaired FDM 3D printers, 3D foot scanners, and networked self-service kiosks across in-house and field (roadshow) locations. Diagnosed and resolved network connectivity issues including firmware updates and physical layer troubleshooting. Produced internal knowledge-base articles and optimized video walkthroughs for low-bandwidth environments. Developed refurbishing checklists and an equipment uptime tracking system. Managed show logistics and vendor relations at Costco roadshow locations.

- Took lead on several projects with many large moves, beating project timeline by average of ~10%.
